

# Greek owners consolidate

There are a record 78 Greek-controlled fleets of over 1m dwt each, two more than last year and the same as in 2020 reveals the 36th annual survey by Naftiliaki Greek Shipping Review of Greece's fleets over 1m dwt – the 'Tonne Millionaires'. Of course as the years have passed, ships have got larger and so have the fleets in the hands of major owners but this year's list underlines the on-going development of fleets in the Greek cluster.

**At the beginning of May, 78 companies of the Greek cluster owning fleets of over 1m dwt were trading 3,316 ocean going ships**

According to *Naftiliaki* records and information gleaned from the market, at the beginning of May, the 78 companies from the Greek cluster owning fleets of over 1m dwt were trading 3,316 ocean going ships, some 26 ships down on the previous 12 months, but the total of 355.8m dwt was an increase of just under 6m dwt and up some 12m dwt on 2021 and considerably larger than the 2020 tonne-millionaire fleet of 338m dwt but still trailing the number of ships in the hands of Greece's 'tonne millionaires' then.

The general growth in the millionaires' fleets reflects delivery of ships to Greek interests that were ordered since 2018 as well as purchases made in the secondhand market, a sector in which Greek owners have remained leading players for a number of years.

Another feature is the turnover of fleets in the list. This year there are five new entries while three are missing, including the long-standing Eletson group, which occupied position 68

## GREECE'S TONNE MILLIONAIRES
