Ενισχυμένη αβεβαιότητα λόγω της εμπορικής πολιτικής των ΗΠΑ

## Διεθνείς Μακροοικονομικές Τάσεις

- ▶ Ο μεγάλος βαθμός αβεβαιότητας στην παγκόσμια οικονομία και τις διεθνείς αγορές παραμένει καθώς δεν έχει αποσαφηνιστεί επαρκώς η εμπορική πολιτική των ΗΠΑ (εάν τελικά επιβληθούν δασμοί και πότε, με ποια κριτήρια, σε ποιες χώρες, ύψος αυτών και οι πολιτικές προεκτάσεις τους), αλλά και το τι συνεπάγονται σε γεωπολιτικό επίπεδο οι εξελίξει πρωτοβουλίες του νέου προέδρου τους (πόλεμος στην Ουκρανία, εξελίξεις στη Μέση Ανατολή). Τέλος, σημαντική αβεβαιότητα γεννά η λεκτική αντιπαράθεση από την πλευρά των ΗΠΑ προς παραδοσιακούς συμμάχους που εντείνεται με την πολιτική ρευστότητα στη Γερμανία, τη Γαλλία και τον Καναδά.
- ▶ **Στις ΗΠΑ**, ο ρυθμός ανάπτυξης κατά το δ' τρίμηνο διαμορφώθηκε στο 2,3% (τριμηνιαίος-ετησιοποιημένος ρυθμός) και συνολικά στο 2,9% το 2024 (2023: 2,8%). Παράλληλα, ο πληθωρισμός το τελευταίο διάστημα εμφανίζει ελαφρά άνοδο, για συγκυριακούς κυρίως λόγους, παραμένοντας σχετικά κοντά στον στόχο της Fed, ενώ και οι συνθήκες στην αγορά εργασίας διατηρούνται αρκετά καλές. Συνεπώς, δεν εκπλήσσει η δήλωση της Fed ότι δεν υπάρχει βιασύνη για χαλάρωση της νομισματικής πολιτικής της (υπονοώντας την περαιτέρω μείωση του βασικού επιτοκίου της), ιδίως όταν δεν μπορεί να εκτιμηθεί η επίδραση της εμπορικής πολιτικής στην εξέλιξη του πληθωρισμού. Γενικότερα, η οικονομία συνεχίζει να αναπτύσσεται με ιδιαίτερα ικανοποιητικό ρυθμό, στηριζόμενη κυρίως στην ιδιωτική κατανάλωση και οι πρόδρομοι δείκτες είναι γενικά ευνοϊκοί. Βασικό μας σενάριο για το 2025 είναι η ανάπτυξη να συνεχιστεί με ρυθμό που θα ξεπεράσει το 2%, αν και χαμηλότερο του 2024.
- ▶ **Στην Ευρωζώνη** η οικονομία κατά το δ' τρίμηνο εμφάνισε οριακή ανάπτυξη σε τριμηνιαία βάση (0,1%) και υπολογίζεται ότι συνολικά το 2024 πέτυχε ρυθμό ανάπτυξης 0,7%. Ο πληθωρισμός παραμένει σχετικά κοντά στον στόχο του 2% της EKT και εκτιμάται ότι θα συγκλίνει σε αυτόν προς το τέλος του έτους, ενώ και το ποσοστό ανεργίας διατηρείται εξαιρετικά χαμηλά. Ωστόσο, οι προκλήσεις και η αβεβαιότητα σε οικονομικό και πολιτικό επίπεδο έχουν αυξηθεί σημαντικά. Απαιτείται η διαμόρφωση κατάλληλων στρατηγικών απέναντι στο (πολύ πιθανό) ενδεχόμενο επιβολής δασμών από πλευράς ΗΠΑ στις ευρωπαϊκές εξαγωγές, στη διαφαινόμενη απευθείας διαπραγμάτευση των ΗΠΑ με τη Ρωσία για τον τερματισμό του πολέμου στην Ουκρανία, τη μειούμενη ανταγωνιστικότητα τη ευρωπαϊκής βιομηχανίας απέναντι στις ΗΠΑ και την Κίνα και τη θέση της ΕΕ στις νέες τεχνολογικές εξελίξεις. Επιπλέον, αυτές οι λύσεις θα πρέπει να αναζητηθούν σε ένα περιβάλλον ιδιαίτερα ρευστό πολιτικά και με αρκετά κράτη-μέλη σε δυσχερή δημοσιονομική θέση, που η γήρανση του πληθυσμού την επιβαρύνει περαιτέρω. Συνεπώς, η χαλάρωση της νομισματικής πολιτικής από πλευράς EKT απομένει ουσιαστικά ο κύριος μηχανισμός στήριξης με τρόπο, όμως, που δεν θα αναζωπυρώσει τις πληθωριστικές πιέσεις.
- ▶ **Στην Κίνα**, η οικονομική δραστηριότητα συνεχίζει να αναπτύσσεται με ισχυρό, αν και κάπως πιο συγκρατημένο ρυθμό, σε περιβάλλον όπου πρακτικά απουσιάζουν οι πληθωριστικές πιέσεις. Η επιβολή δασμών ύψους 10% στις κινεζικές εξαγωγές από πλευράς ΗΠΑ και η πολύ περιορισμένη αντίδραση της Κίνας εκτιμάται ότι αφήνει σημαντικό περιθώριο για συνεννόηση μεταξύ των δύο μεγαλύτερων οικονομιών.

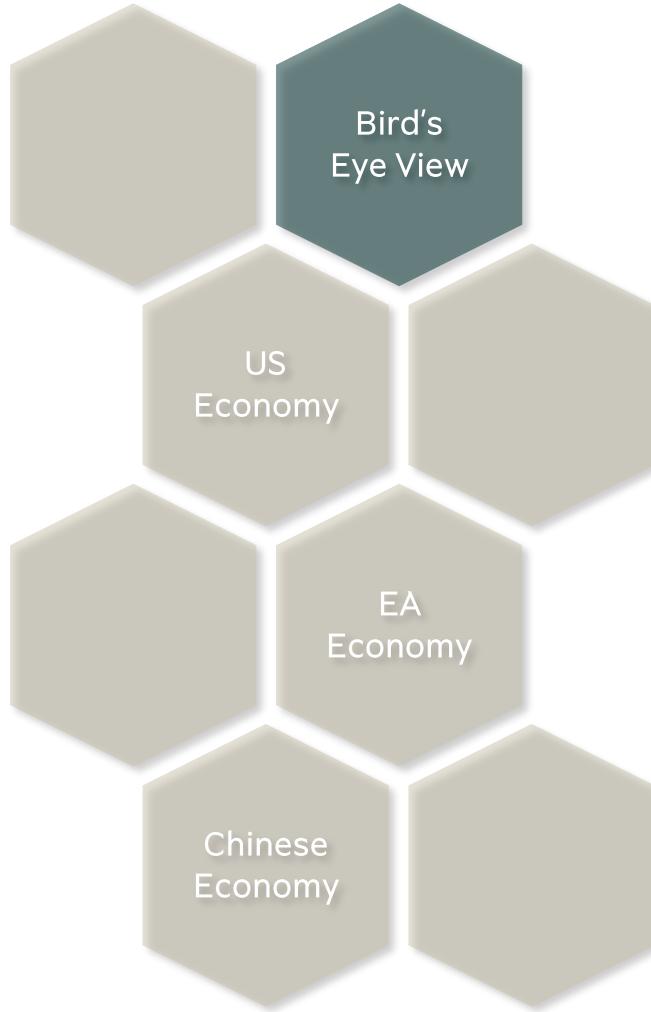

## Global macro trends

---

- ▶ **There is considerable uncertainty in the global economy and international markets** due to unclear trade policies of the United States, including questions about whether tariffs will be imposed, the criteria for such decisions, the countries affected, their magnitude, and potential political implications. Additionally, the geopolitical effects of ongoing initiatives by the new president, including the conflict in Ukraine and developments in the Middle East, are still not fully understood. Furthermore, verbal confrontations between the United States and its traditional allies, combined with political changes in Germany, France, and Canada, contribute to this uncertainty.
- ▶ **In the US**, the 4Q growth rate was 2.3% (quarterly-annualized rate), with an overall growth rate of 2.9% in 2024 (compared to 2.8% in 2023). Inflation has recently experienced a slight increase due to temporary factors, remaining close to the Federal Reserve's target, while labor market conditions continue to be stable. Consequently, the Federal Reserve has indicated that there is no immediate need to adjust its monetary policy, taking into consideration the uncertain impact of trade policy on inflation. The economy continues to expand at a steady rate, primarily driven by private consumption, with leading indicators generally positive. Our baseline scenario for 2025 forecasts continued growth at a rate exceeding 2%, although slightly lower than in 2024.
- ▶ **In the euro area**, the economy grew marginally in the fourth quarter on a quarterly basis (0.1%), achieving an overall growth rate of 0.7% for 2024. Inflation remains relatively close to the European Central Bank's 2% target and is expected to converge towards it by the end of the year, while the unemployment rate remains exceptionally low. However, challenges and uncertainties at the economic and political levels have significantly increased. Appropriate strategies are required to address the likely imposition of tariffs by the US on European exports, the direct negotiations between the US and Russia to end the war in Ukraine, the declining competitiveness of European industries compared to the United States and China, and the EU's position regarding new technological developments. Furthermore, these solutions need to be sought in a politically volatile environment with several member states in a difficult fiscal position, further burdened by aging populations. Therefore, the relaxation of monetary policy by the ECB remains essentially the main support mechanism, in a manner that does not reignite inflationary pressures.
- ▶ **In China**, economic activity continues to grow at a strong, albeit somewhat more restrained pace, in an environment where inflationary pressures are practically absent. The imposition of 10% tariffs on Chinese exports by the United States and China's very limited response is estimated to leave significant room for negotiation between the two largest economies.
